

The School of Computing cannot and will not tolerate any form of academic dishonesty by its students. This includes, but is not limited to 1) cheating on examinations, 2) plagiarism, or 3) collusion. Students are expected to be fully aware of the academic integrity policies as outlined in the syllabus.

Definitions:

A. Cheating on an examination includes:

1. Copying from another's paper, any means of communication with another during an examination, giving aid to or receiving aid from another during an examination.
2. Using any material during an examination that is unauthorized by the proctor.
3. Taking or attempting to take an examination for another student or allowing another student to take or attempt to take an examination for oneself.
4. Using, obtaining, or attempting to obtain by any means the whole or any part of an unadministered examination.

B. Plagiarism is the unacknowledged incorporation of another's work into work which the student offers for credit.

C. Collusion is the unauthorized collaboration of another in preparing work that a student offers for credit.

D. Other types of **academic dishonesty** include using other student's printouts, files, materials; posting problems on "homework sharing" websites (this would be considered extra heinous) or obtaining solutions from such sites; pressuring other students into collusion; having another student or professional perform the work "on hire".

Notes:

1. The use of the source code of another person's program, even temporarily, is considered **plagiarism**.
2. Allowing another person to use your source code, even temporarily, is considered **collusion**.
3. The penalty assessed for cheating on a given assignment will be at least twice the weight of the assignment and will include notification of the proper authorities.

I have read and I understand the above statement.
